A time & cost saving revolution

# Get more done in less time

Our job is to help you find new ways to grow your business. That is why we are continuously improving and developing new IT tools so that you can concentrate on your side of the business.

The Freight Portal is our brandnew web-based booking management service that will make your booking process easier and quicker.

The booking overview is managed by a dashboard at the top of the Manage page. In the dashboard you see an overview of the bookings on all your accounts. From here it is possible to click on the dashboard to drill down and apply filters to the search overview. The dashboard makes

it easy to find unused block bookings, waitlist bookings or set a time limit to keep track of units not checked in at our ships within a certain time before departure.

Furthermore, you also have an excellent overview of your incoming unaccompanied units or those standing on quay, ready to be picked up.

The Freight Portal has a custom built unique booking overview

where you can easily update your bookings directly in the search summary. A booking is automatically updated when you leave the row in the overview. In the Freight Portal you can also quickly create multiple bookings on a departure.

You simply just log into the Freight Portal with your username and password, the same account credentials you use for both the Planner App and the previous booking site; Extranet. The Freight Portal is rolled out to our customers holding credit accounts and in second release we will support card payments.

We recommend you to use any of the following browers to access the system: Google Chrome, Microsoft Edge or Mozilla Firefox.

# Freight Planner App

With the Freight Planner App, our booking app for Freight Portal users, you have easy access from any mobile device, i.e. if you are out of the office and need to access your bookings.

Full booking and update functionality ready on hand.

More information about the Freight Planner App can be found here.

4

# Freight Driver App

In the Freight Driver App you can cancel and/or transfer send and share bookings from the Freight Portal or Planner app with drivers. Drivers will be able to open the booking and see up More information about the to date booking changes.

The application can also be activated to include the possibility for the drivers to

bookings themselves - just let us know your requirements.

Freight Driver App can be found here.
