## Additional points of special attention North Sea

1

### ENS Import NL - Select the correct Customs Status

It is important to select the correct Customs Status in the ENS as it effects the information sends to CustomsNL in ENS and ATO as well as the process.

#### Available customs statuses in the ENS:

Customs status	Description
IM	Import from 3rd country, no customs procedure applicable
T1	Goods accompanied by a NCTS document T1
T2	Goods accompanied by a NCTS document T2
T	Goods accompanied by a NCTS document combined T1+T2
RP	Returning EU packaging simplefied procedure
TA	ATA/TIR Carnet
AR	Shipments NATO Army

2

### All consignments require a Notification Import Documentation with Portbase (GB to NL)

Every consignment ID created in the ENS for Import into NL will require a notification Import Documentation with Portbase. If 1 consignment (or more) does not have a Notification Import Documentation, unit will remain on hold in the terminal and will not be allowed to leave the terminal.

## Additional points of special attention North Sea

### 3

#### Who takes care of the Notification Import Documentation with Portbase (GB to NL)?

Customs status ENS	Who takes care of the Notification Import Documentation?
IM	Haulier / declarant / importer
T1	Stena Line
T2	Stena Line
T	Stena Line
RP	Stena Line
TA	Stena Line
AR	Stena Line
T2F	Haulier / declarant / importer
TV	Haulier / declarant / importer

### 4

#### Notification Import Documentation with Portbase: Shipment ID (GB to NL)

For the Notification Import Documentation with Portbase, you need to fill in a 'Shipment ID'. This 'shipment ID' is the consignment ID you created in the ENS. The correct format looks like this: STNL0071234567001, STNL0071234567002, etc.

This consignment ID is shown on the ENS page in Freightportal. This consignment ID is available in eConnect as well.

If you fail to put in the correct ID, Stena Line will not receive the Notification Import Documentation from Portbase, the unit will remain on hold on quay and won't be able to leave the terminal.

## Additional points of special attention North Sea

5

### Notification Export Documentation with Portbase: bookingnumber (NL to GB)

For the Notification Export Documentation with Portbase, you need to fill in a 'Booking number'. This is the SCAC booking number of Stena Line. The correct format looks like this: STNL0071234567.

This SCAC booking number is shown in the EXPORT field in Freightportal. This SCAC booking number is available in eConnect as well.

If you fail to put in the correct booking number, so if you for example fill in 71234567 instead of STNL0071234567, Stena Line will not receive the Notification Export Documentation with Portbase and will not be able to check-in the unit.

6

### Trade units are considered as loaded

All trade units, like trade chassis, trade machines, trade caravans will require:

- For NL to GB: Notification Export Documentation with Portbase prior check-in
- For GB to NL: ENS created with at least 1 consignment. (Trade units should not be declared as empty in the GB-NL ENS as you require a consignment for the Notification Import Documentation)
- For GB to NL: Notification Import Documentation with Portbase
