

Freight Portal

A time & cost saving revolution

stenalinefreight.com

Get more done in less time

The Freight Portal is our webbased booking management service that will make your booking process easier and quicker. Our job is to help you find new ways to grow your business.

In Freight Portal you get an overview of all your bookings. Create, change and download financial documents whenever you need.

Login to Freight Portal with your username and password. We recommend you to use any of these browers: Google Chrome, Microsoft Edge or Mozilla Firefox.

In the dashboard you see an overview of the bookings on all your accounts. Apply filters to search the overview and find exactly what you are looking for.

The dashboard makes it easy to find unused block bookings, waitlist bookings or set a time limit to keep track of units not checked in at our ships within a certain time before departure. Furthermore, you have an overview of your incoming unaccompanied units or those standing on quay, ready to be picked up.

Create one or multiple bookings on a departure. Update bookings directly in the search summary. When editing the updates are automatically saved once you leave the row in the overview. Go to financial documents to download invoices in a convenient .PDF or .CSV format.

Freight Planner App

With the Freight Planner App, our booking app for Freight Portal users, you have easy access from any mobile device with an internet connection. Login with the same credentials as to Freight Portal to create new bookings or access your existing ones.

Freight Driver App

Drivers can recieve details of bookings from Freight Portal or Freight Planner app. Drivers will be able to open the booking and see up to date booking changes.

The application can also be activated to include the possibility for the drivers to cancel and/or transfer bookings themselves - just let us know your requirements.
