

Intermodal in Freight Portal

Easy booking and handling

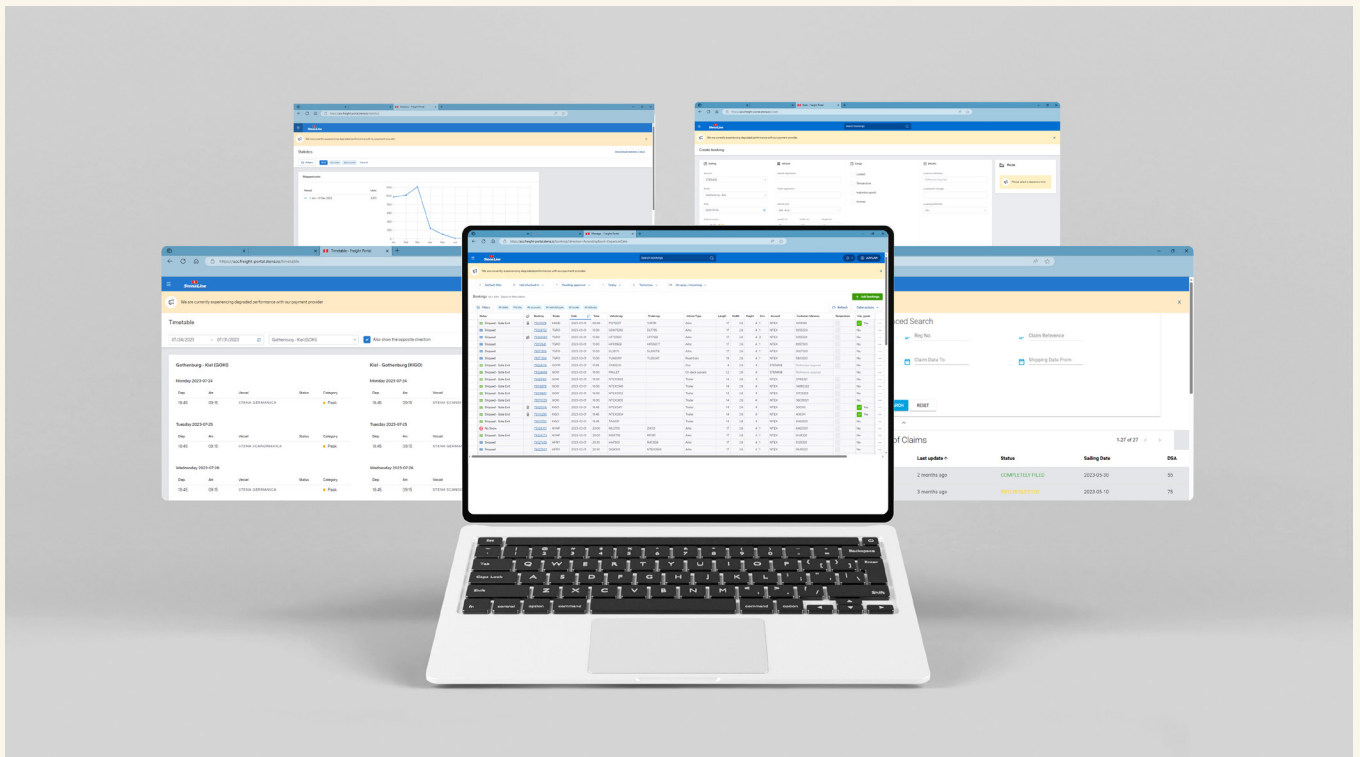

stenalinefreight.com

Get more done in less time

The Freight Portal is our webbased booking management service that will make your booking process easier and quicker. Our job is to help you find new ways to grow your business.

In Freight Portal you get an overview of all your bookings. Create, update and download financial documents whenever you need.

Login to Freight Portal with your username and password. We recommend you to use any of these browsers: Google Chrome, Microsoft Edge or Mozilla Firefox.

In Freight Portal you gain complete control and insight to your bookings on all statuses: planned, in shipment, cancelled or already arrived.

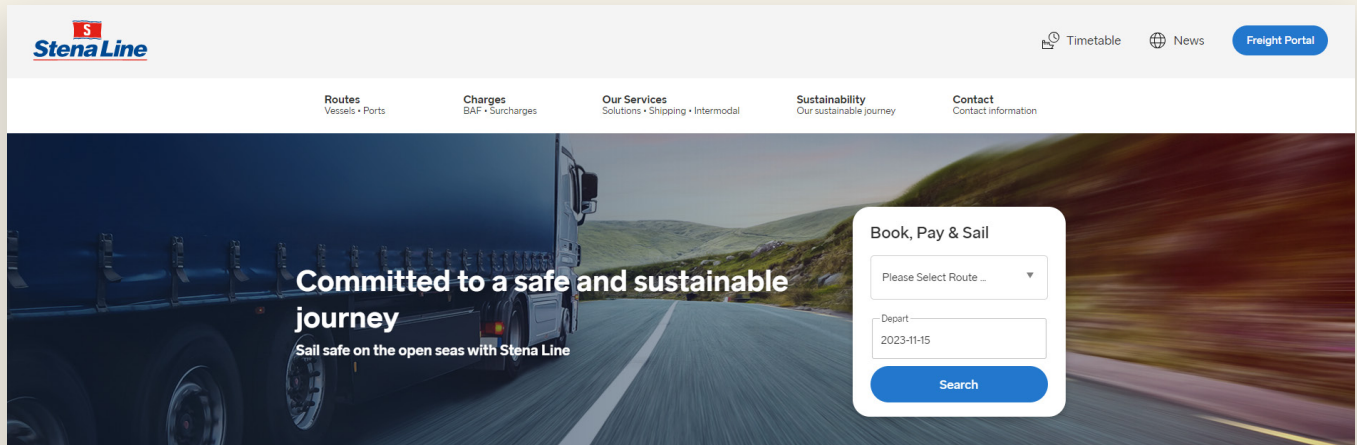

Furthermore, you have an overview of your incoming units or those standing on quay, ready to be picked up.

Update booking directly from the overview or use the search bar to find the correct booking. The system is auto-saving every update you make once you leave the row with changes. If you want to download financial documents, invoices are available in .PDF, or .CSV-format.

Access Freight Portal

You access the through the link: [Freight Portal](#) or via the website stenalinefreight.com.

Login with your credentials given to you by our Intermodal team.

Overview your bookings

In the Intermodal overview, all current and passed bookings are shown in a simple list. The default overview show your bookings sorted by the created date, you can however sort the view based on factors such as status, route, tag or time for departure or arrival.
