**FREE ENS BUILDER**

# COMING SOON *(January 2025)*

## Hauliers – these are the new requirements for GB imports!

From January 2025, businesses with freight vehicles entering Great Britain will be required to provide an S&S GB (Safety & Security Great Britain) declaration.
**Stay compliant & train your team for FREE with our ENS builder tool.**

## S&S GB – what you need to know

An Entry Summary declaration (also known as an ENS) is used by GB border authorities to analyse the potential risk caused to their territory by goods crossing their border.

## Why is preparing for S&S GB so important?

It is highly likely that GB border control will be strictly enforcing S&S GB ENS requirements.

**Anybody not providing the correct entry summary declaration will not be able to travel and will be liable to customs penalties.**

## What information do you need to provide?

Similar to existing GB to EU ENS requirements, for S&S GB declarations you will need to submit the following to ensure you can board ferries or LeShuttle (Eurotunnel) Freight trains:

- **Valid EORI number** *(apply for yours here)*
- Importer & Exporter company details
- Reference number
- Haulier Company Details (for driver accompanied vehicles)
- Ferry Operator (for unaccompanied trailers)
- Total number of packages and weight

- Border entry point (name of port)
- ETA time and date
- Vehicle Identification Number (VIN)
- Trailer seal (if applicable)
- Description of goods
- Type of packages
- Any marks and reference numbers

# How to prepare for the upcoming GB ENS requirements

The deadline may be weeks away, but securing a straightforward and simple solution for your S&S GB (GB ENS) document is essential to remain compliant and avoid fees.

As a leading UK-based customs broker, we are in pole position to support you with your transport documents, including GB ENS. In fact, our experts have already created our digital GB ENS solution for your convenience.

For a walk-through of GB ENS on the CustomsLink platform, get in touch with us.

*Alternatively, watch our video demonstration on our YouTube channel.*

## Welcome to CustomsLink RoRo Safety & Security ENS/EXS creator

This is the Ro-Ro Safety & Security (SSD) ENS/EXS builder for the following routes

**GB > EU and EU > GB**

Depending on arrival jurisdiction, SSD responses take between 30 minutes to 2 hours.

If your SSD is rejected between 2100hrs - 0800hrs, this will need manual intervention and will be executed the next day at 0800hrs. There are various reasons why rejections occur and we may have to contact local authorities to handle rejections on your behalf.

Please add your Entry Name below *          Which type?

Entry Name

○ EU ENS  ○ EXS
◉ GB ENS

Create SSD

### The CustomsLink API

If you have high volumes of declarations to process, we can connect your transport planning software to our systems for seamless integration.

## Why choose CustomsLink?

From January 2025, you will be able to make your S&S GB declarations with our Haulier Border Toolkit. This is our packaged solution for hauliers who already generated their customs documents and need to create an SSD / EXS /ENS and more.

Get expert support from our team 7 days a week when you choose CustomsLink as your customs agent.

**Competitive rates**          **Save time**          **Stay compliant**          **Stay in control**
